

MICROSOFT DYNAMICS 365

Integration
Made Simple

ASSESS & CONFIGURE

Assess Data Storage Needs

Understand your data types - customer records, multimedia, documents-to guide effective Azure Blob Storage configuration.

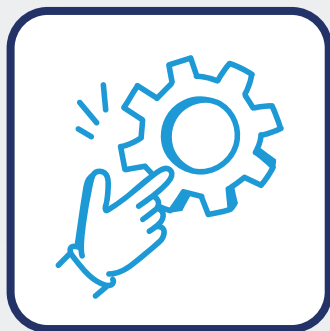

Configure Azure Blob Storage

Set up an account, establish containers, and define access controls based on business requirements for secure and organized data storage.

LEVERAGE & DEFINE

Leverage DynaTech's Tool

At DynaTech, we understand the complexities of integrating Dynamics 365 with Azure Blob Storage. To simplify this process, we have developed a custom tool that seamlessly connects these two platforms.

Our tool is designed to handle data migration, synchronization, and real-time updates, ensuring a smooth and efficient integration experience for our clients.

Define Integration Rules

Ensure data consistency by establishing precise integration rules for accurate synchronization between Dynamics 365 and Azure Blob Storage.

TEST & MONITOR

Test Integration

Prior to deployment, conduct thorough testing to identify issues and ensure smooth data synchronization and compatibility.

Monitor & Optimize

Continuously monitor performance post-deployment, optimizing processes to maintain efficiency and enhance user experience.

TOOL BENEFITS

■ Easy-to-Upload Functionality

Seamlessly upload files directly from Dynamics 365 CRM.

■ Intuitive Drag and Drop

Simplify file uploads with a user-friendly drag-and-drop feature.

■ Convenient Navigation

Access a centralized file repository within CRM for efficient file retrieval.

■ Simplified File Management

Manage files directly within Dynamics 365 CRM for a clean and organized.
