import React, { useState, useEffect, useRef } from "react"

import { CSSTransition } from "react-transition-group'

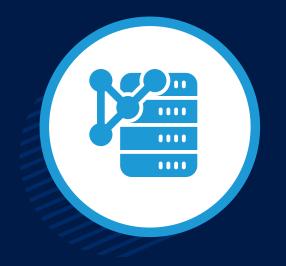

Developers can now create Al-powered automations more efficiently. Generative Actions and GPT-4-powered document processing accelerate the creation of workflows. Simplify and optimize business processes using natural language and low-code tools.

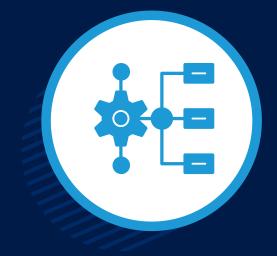

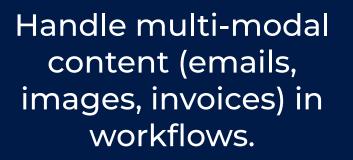

DynaTech Systems **Microsoft** Solutions Partner

Next-Gen Document Processing

Extract and process unstructured data from documents using natural language.

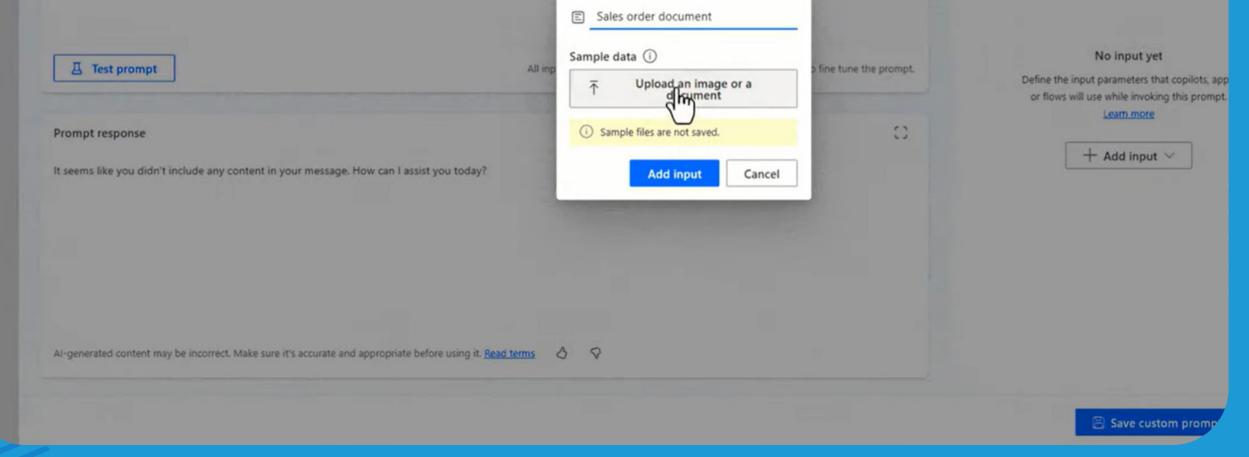

No need for lengthy Al training—boost productivity with ready-to-use tools.
